CHEEKS FAMILY WEBSITE "RELATIVES ONLY" OVERVIEW

The **"Relatives Only"** area will provide access to:

- The current **Cheeks Family Information Directory** that contains registered family members' contact and family information.

  Each registered family member will be able to view and update/maintain their individual contact/family information

- The various **Cheeks Family Trees**, both document and diagram versions.
- The various **Cheeks Family Mailing Lists.**

In addition, the **"Relatives Only"** area provides access to selected content from the family Facebook Group.

This access is for registered family members who do not want to create and maintain a personal Facebook Page, required to join the family Facebook group, but would like to have access to the family Facebook Group content.

Custom software is in development that will provide an interface between the family website **"Relatives Only"** area and the **Cheeks Family Facebook Group**. That interface will allow website registered family members access to the family Facebook Group content without participating as a Facebook member.
